## SITUATION:

Removal activities are continuing. See previous Polreps for historical information.

## ACTIONS TAKEN:

The following actions were taken for the period of 4/13/93 thru 4/27/93:

-ERCS completed contract arrangements with Clark Processing Inc., Dayton, Ohio, a fuels blender, for disposal of non-hazardous waste oil. Forte Transfer of Morton Illinois was contracted as the transporter.

-ERCS is continuing to pump and separate waste oils/water from various tanks. Waste oil is transferred to oil holding tanks for shipment to Clark Processing. Oily wastewater is transferred to the oil water separator receiving tank for wastewater treatment.

-On 4/26/93 and 4/27/93 two tanker loads waste oil were shipped to Clark Processing Inc. in Dayton, Ohio (See Waste Disposal Summary).

-TAT completed hazard characterization 1224 drum samples and is compiling a list of the different waste streams. Approximately 1300 drums remain to be inventoried, sampled, and characterized.

-ERCS fabricated a drum slide/stabilization tank. Sludges from drums and tank bottoms are being stabilized with Bag House Lime.

-ERCS started to bulk drums containing oil/water into the oil water separator receiving tank.

-The IEPA issued a press release to the media on 4/26/93. On 4/27/93, the local TV and newspapers visited the site to update the community on site progress. U.S. EPA OSC Gabien and members of the IEPA, Greg Dunn, Project Manager and Mara McGinnis, Community Relations, were interviewed with the media.
